

Reuben Domike, Ph.D.

Reuben Domike, Ph.D. is an assistant professor and director of the Hostetter Centre for Enterprise and Entrepreneurship at the UPEI School of Business.

Reuben currently teaches in areas of business statistics, operations management, corporate finance, innovation management and entrepreneurship, and global issues in business and industry.

Over the past ten years, Reuben has been involved in developing technology start-up companies; two of which are now significant with millions of dollars in revenue and tens of employees each.

Reuben also worked for GlaxoSmithKline in the U.K. and as the director for an academic center for entrepreneurship at a university in Ohio.

Reuben holds three graduate degrees from M.I.T. including a Ph.D.

Current research activities are primarily in collaboration with the Center for Biomedical Innovation at the M.I.T. Sloan School of Management focused on pharmaceutical development, deployment of process analytical technologies, and location-specific risk management models.
